

Accessing YC Journal Databases

Accessing databases from the College (any campus)

1. Go to the library website at <http://yukoncollege.yk.ca/library>
2. There are two options to access databases on campus (located beneath the “Find Books” search box):
 - a. Click on “**Find Articles: All Databases**” to see a full list of databases
 - b. Click on “**Find Articles: Databases by Subject**” to see a list of recommended databases by discipline)
3. If you chose the “All Databases” option, click on the database name you wish to search and then click on the Ayamdigut link (if you are in Whitehorse) or Community Campus link (if you are in the communities) to open the database.
4. If you chose the “Databases by Subject” option, click on the discipline/main subject you are interested in and then click on the database name you wish to search. Click on the Ayamdigut link (if you are in Whitehorse) or Community Campus link (if you are in the communities) to open the database.

Accessing databases from home

IMPORTANT: Remote access to databases require authentication. Make sure you have a current library account (a current barcode number should be located at the back of your student card) and library password before you proceed.

1. Go to library website at <http://yukoncollege.yk.ca/library>
2. Click on “Find Articles: Databases from Home”
3. Enter your student number (e.g. 000012345) and library password and then click on “Submit Request”
4. Choose a database from the list available on the Remote Resources Page.
